## Experience

### Alore Growth OS

Bengaluru, India

JAVA/ ANGULAR DEVELOPER

June 2019 to Present

It is a Sales Machine that will create ongoing, predictable revenue for an early stage company from Day 1. It offers everything needed to run a sales team at scale - from finding business email addresses to running automated drip campaigns to monitoring the performance of sales teams. Basically it's the only sales tool that your business will ever need. It's features include:

- Experienced working on different layers of Spring MVC architecture such as Spring - Controller, service and repository classes
- Worked On Crm Inbox features like messages, integrating with google calendar events, mails also outlook calendar events, tasks, notes, deals, profile information of user, documents, calls using Spring boot, Angular 8, Jpa, mysql technologies.
- Good experience working on Hibernate Beans and HQL to map to tables and retrieve data from the database
- Worked upon Services, Components and Routing in Angular 2
- Worked upon Angular 8 Service which interacts with RESTful services at backend
- Collaborated for Angular 2 Components which takes care of view part of the application
- Tested Rest APIs in Spring-Controller at backend for JSON data using Postman
- Used Spring Boot at back-end which helps to develop application with ease
- Worked on spring security access tokens validations
- Used Postman to test the RESTful API for HTTP requests such as GET, POST, and PUT.
- Excellent knowledge on Spring Core such as Dependency Injection, Annotations and XML based Configurations.
